<u>AMENDMENTS TO THE CLAIMS:</u>

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) A method of assembling a packaged high frequency circuit module including the steps of :

providing a ceramic substrate having one or more elongate stub walls projecting from a planar surface thereof;

firing the ceramic substrate;

processing the surface of the substrate until the planar surfaces of the <u>one or</u>

more elongate stub walls are uniform and parallel;

applying a conductive adhesive to the processed surfaces of the <u>one or more</u> stub walls; <u>and</u>

placing a housing lid over the substrate, the lid having one or more members projecting from a planar surface thereof so that the members align with the <u>one or more</u> stub walls of the substrate to form a composite structure.

2. (Currently Amended) [[A]] <u>The</u> method according to claim 1, wherein the <u>one or more</u> stub walls extend, at least partially, around the periphery of the planar surface of the substrate.

- 3. (Currently Amended) [[A]] <u>The</u> method according to claim 1, wherein <u>the</u> one or more stub walls project from <u>the internal surface</u> <u>an inner wall track</u> of the substrate.
- 4. (Currently Amended) [[A]] <u>The</u> method according to claim 1, wherein the projection of the <u>one or more</u> stub walls from the planar surface of the substrate is proportional to predetermined surface distortion values for such a the substrate.
- 5. (Currently Amended) [[A]] <u>The</u> method according to claim 1, wherein processing the <u>a</u> surface <u>of the substrate</u> comprises one or more of grinding, lapping or polishing the surface.
- 6. (Currently Amended) [[A]] <u>The</u> method according to claim 1, further comprising the steps of

applying pressure to the composite structure and curing the conductive adhesive.

- 7. (Withdrawn) A method according to claim 1, wherein the elongate stub walls project from the upper planar surface of the substrate.
- 8. (Withdrawn) A method according to claim 1, wherein the elongate stub walls project from the lower planar surface of the substrate.

- 9. (Withdrawn) A high frequency circuit module comprising:
- a ceramic substrate having one or more elongate stub walls projecting from a planar surface thereof, the planar surfaces of the stub walls having been processed so that they are uniform and parallel;

a conductive adhesive layer on the processed surfaces of the stub walls; and a housing lid mounted over the substrate, the lid having one or more members projecting from a planar surface thereof so that the members align with the stub walls of the substrate to form a composite structure.

- 10. (Currently Amended) [[A]] <u>The</u> method according to claim 2, wherein one or more stub walls project from the internal surface an inner wall track of the substrate.
- 11. (Currently Amended) [[A]] <u>The</u> method according to claim 2, wherein the projection of the <u>one or more</u> stub walls from the planar surface of the substrate is proportional to predetermined surface distortion values for <u>such a the</u> substrate.
- 12. (Currently Amended) [[A]] <u>The</u> method according to claim 3, wherein the projection of the <u>one or more</u> stub walls from the planar surface of the substrate is proportional to predetermined surface distortion values for <u>such a the</u> substrate.
- 13. (Currently Amended) [[A]] <u>The</u> method according to claim 2, wherein processing the <u>a</u> surface <u>of the substrate</u> comprises one or more of grinding, lapping or polishing the surface.

Attorney's Docket No. 1033963-000020 Application No. 10/567,377 Page 6

- 14. (Currently Amended) [[A]] <u>The</u> method according to claim 3, wherein processing the <u>a</u> surface <u>of the substrate</u> comprises one or more of grinding, lapping or polishing the surface.
- 15. (Currently Amended) [[A]] <u>The</u> method according to claim 4, wherein processing the <u>a</u> surface <u>of the substrate</u> comprises one or more of grinding, lapping or polishing the surface.
